About Me

Product Designer with 5 years of experience in ecommerce, combining user research and product thinking to deliver measurable business outcomes.

I define and improve digital experiences by identifying user needs, analyzing behavior, and aligning solutions with business goals and technical constraints. My work focuses on optimizing conversion, product discoverability, and delivery efficiency through iterative design and cross-functional collaboration.

Professional Experience

Product Designer
Ecommerce Platforms
KRONOTIME

2025 - Present

- Led the design and delivery of ecommerce features, balancing user experience, business goals, and technical constraints.
- Applied UX analysis to identify friction in key flows (product discovery, checkout), proposing improvements during development cycles.
- Implemented generative AI workflows, reducing feature delivery time by 50% while maintaining experience quality.
- Coordinated with cross-functional teams to ensure product requirements and UX decisions were correctly implemented.
- Contributed to continuous product improvement by identifying blockers, usability issues, and optimization opportunities.

Product Designer
UX & Growth
KRONOTIME

2023 - 2024

- Led redesign initiatives across 15+ ecommerce sites, improving navigation, information architecture, and conversion flows.
- Identified user and business opportunities through research and behavioral analysis, translating insights into product improvements.
- Reduced pagination by 50% on Onda de Mar, improving product discoverability and user engagement.
- Contributed to Kreditime product growth, generating 1,000+ leads and increasing conversion rates by 15–20%.
- Facilitated workshops to align stakeholders on user needs, product priorities, and solution direction.
- Implemented structured design processes (Double Diamond), improving clarity in decision-making and delivery.

UX/UI Designer
(Product-focused)
KRONOTIME

2021 - 2022

- Supported product improvements through usability testing, research insights, and iterative design.
- Designed wireframes and prototypes to validate solutions and improve user interaction flows.
- Collaborated with product and development teams in agile environments to deliver continuous improvements.
- Conducted usability audits to identify friction points and support product optimization.
